

JKS

You have a challenge.
We have the **solution.**

For more than 60 years, we have been dedicated to improving our technology in **plastic injection and transformation.**

- Brazilian Industry
- Founded in the 1950s
- Headquartered in Guarulhos/SP
- More than 5,000 m² of facilities
- Operating in the agribusiness market for 21 years
- High-tech equipment and machinery
- Over 100 employees
- Serving both domestic and international markets

JKS

Since 2003, we have used our **expertise in plastic injection**, accumulated over decades, to produce innovative solutions for agribusiness.

We offer the most comprehensive range of recyclable plastic solutions and are the **largest manufacturer of rigid plastic trays in Latin America**, leading the segment.

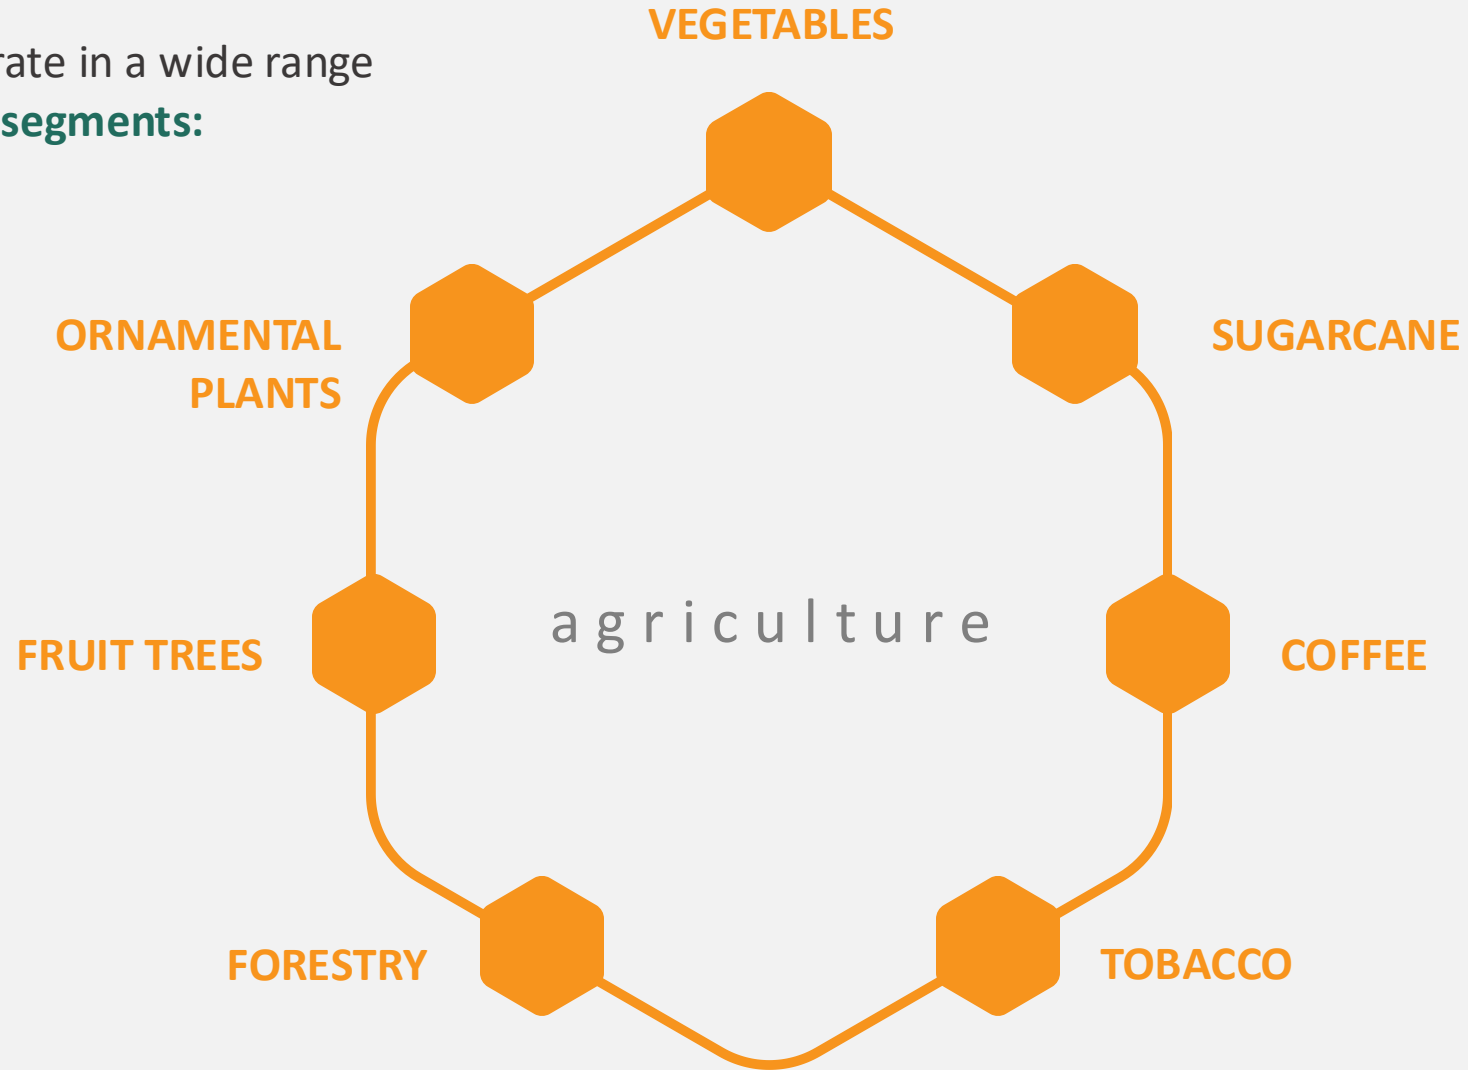

Our products are developed in partnership with **our customers**, for the most diverse types of cultivation.

By combining our clients' challenges with our expertise in manufacturing, we **develop rigid plastic (PP) trays and tubes** that meet the needs of the most demanding producers.

Today, we operate in a wide range of **agricultural segments:**

We have developed a comprehensive product line to serve the protected cultivation market:

ADVANTAGES OF JKS AGRO'S TRAYS

- **Healthier cultivation** – Promotes more uniform growth and contributes to the production of more vigorous seedlings;
- **Increased productivity** – Stimulates greater profitability of the nursery;
- **Economy** – Collaborates to reduce costs with storage, washing, breakages and losses;
- **Enables correct sanitary management** – Ease of cleaning and disinfection;
- **100% recyclable material** – Resistant and durable that makes it possible to carry out reverse logistics;
- **Significant environmental benefits**– Contributes to eco-efficiency and ESG initiatives.
- **Ease of transport** – Optimization of storage space.

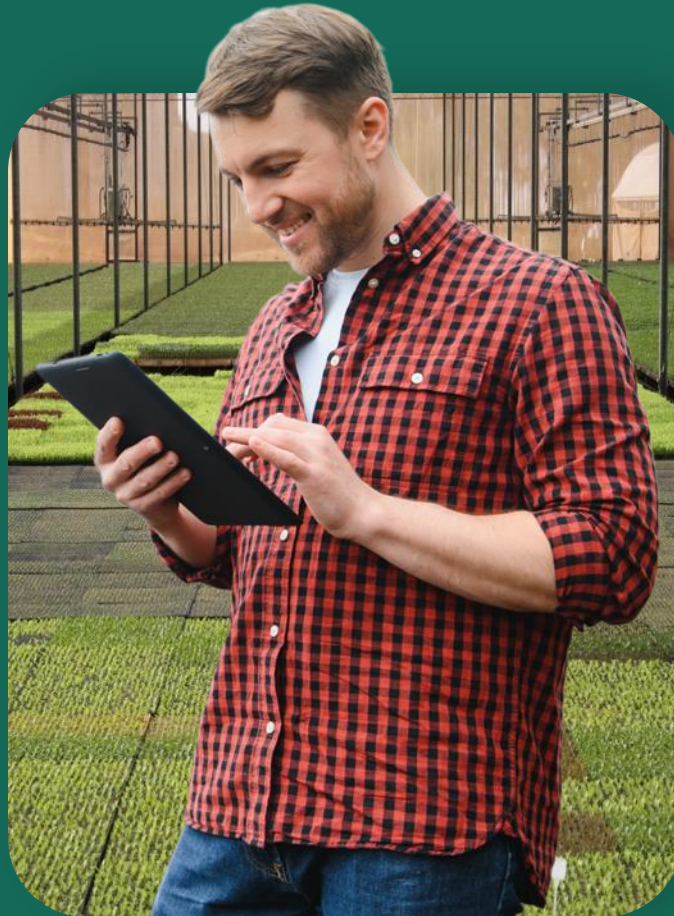

The numbers show that we have contributed to the **success of thousands of customers.**

Million trays produced

+25

Million pots produced

Currently, we are the largest company in Latin America in the rigid plastic trays sector for agriculture.

And we keep growing!

We are dedicated to being part of the **transformation of the world** into a more **sustainable** place in constant **economic growth**.

- Along with our **mission to develop sustainable solutions through our products**, there is our concern for the environment.
- In 2024*, we recycled over 979,000 tons of polypropylene, preventing this material from being improperly discarded and benefiting the environment.
-
- We use recyclable polypropylene in the production of our products and we have production models that aim to achieve a cycle of sustainable use of material together with our customers.
